☒ Responsive to communication(s) filed on Dec 8, 1998

☐ This action is **FINAL**.

☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11; 453 O.G. 213.

A shortened statutory period for response to this action is set to expire 3 month(s), or thirty days, whichever is longer, from the mailing date of this communication. Failure to respond within the period for response will cause the application to become abandoned. (35 U.S.C. § 133). Extensions of time may be obtained under the provisions of 37 CFR 1.136(a).

Disposition of Claims

☒ Claim(s) 1-3 is/are pending in the application.

Of the above, claim(s) _____ is/are withdrawn from consideration.

☐ Claim(s) _____ is/are allowed.

☒ Claim(s) 1-3 is/are rejected.

☐ Claim(s) _____ is/are objected to.

☐ Claims _____ are subject to restriction or election requirement.

Application Papers

☐ See the attached Notice of Draftsperson's Patent Drawing Review, PTO-948.

☐ The drawing(s) filed on _____ is/are objected to by the Examiner.

☐ The proposed drawing correction, filed on _____ is ☐ approved ☐ disapproved.

☐ The specification is objected to by the Examiner.

☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. § 119

☐ Acknowledgement is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d).

☐ All ☐ Some* ☐ None of the CERTIFIED copies of the priority documents have been received.

☐ received in Application No. (Series Code/Serial Number) _____

☐ received in this national stage application from the International Bureau (PCT Rule 17.2(a)).

*Certified copies not received: _____

☒ Acknowledgement is made of a claim for domestic priority under 35 U.S.C. § 119(e).

Attachment(s)

☒ Notice of References Cited, PTO-892

☐ Information Disclosure Statement(s), PTO-1449, Paper No(s). _____

☐ Interview Summary, PTO-413

☐ Notice of Draftsperson's Patent Drawing Review, PTO-948

☐ Notice of Informal Patent Application, PTO-152

--- SEE OFFICE ACTION ON THE FOLLOWING PAGES ---

Art Unit: 2875

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1 and 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Marshall *et al.* in view of Groeller.

Marshall *et al.* discloses an automotive signaling device comprising:

at least two bodies **28, 30**, each body having a base **38** and a cover **28** joined to the base, means for attaching **40** each base to a first vehicle **12**, the two bodies being mountable adjacent to the top with one at each side of the first vehicle with the covers facing rearwardly (see Figure 1),

the bodies are mounted at an elevation sufficient for viewing by a plurality of vehicles arrayed serially behind the first vehicle (see column 1, lines 49-64).

Marshall *et al.* lacks a plurality of translucent lenses and illumination means as claimed in the instant invention.

Art Unit: 2875

Groeller discloses an automotive signaling device comprising a plurality of translucent lenses **9, 10** in a cover **2** and a plurality of illumination means **211, 230** for illuminating each of the lenses selectably (see column 3, line 63 through column 4, line 5),

said plurality of illumination means each comprising a plurality of light emitting diodes set in an array to illuminate at least one lens (see column 3, line 63 through column 4, line 5).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to combine the automotive signaling device of Marshall *et al.* with the automotive signaling device of Groeller since Groeller teaches that light emitting diode arrays are beneficial for reducing power consumption and increasing bulb life of automotive signaling devices (see column 1, lines 35-42).

3. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Marshall *et al.* in view of Groeller, and further in view of Roney *et al.*

Marshall *et al.*, as modified by Groeller, applied to the rejection of claim 1 above, lacks the claimed limitation including a circuit board upon which the plurality of light emitting diodes is mounted.

Roney *et al.* discloses an automotive signally device comprising a circuit board **20** positioned between a cover **16** and a base **10**, further including a plurality of light emitting diodes **12** mounted to the circuit board **20** (see column 2, lines 52-54).

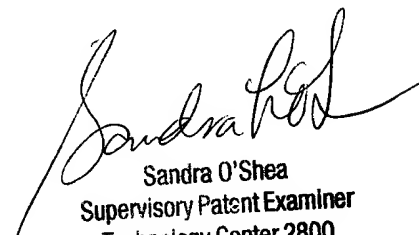

It would have been obvious to one having ordinary skill in the art at the time the invention was made to combine the automotive signaling device of Marshall *et al.*, as modified

Art Unit: 2875

by Groeller, with the circuit board mount of Roney *et al.* because Roney *et al.* teaches that light emitting diodes can be mounted to a circuit board in order to help reduce the junction temperature (see column 1, lines 24-58).

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bryan Stanley whose telephone number is (703) 306-5981.
